Gift Shop News: Have you ever heard of Dichroic Glass? One of our artists creates jewelry that seems to shimmer and shift colors right before your eyes. The piece is designed and shaped by cutting and layering glass (some with 30-50 layers) and then fired. The magic occurs when the colors change, the glass moves in the fierce heat, and the piece comes to life. The fire and individual creative energy produce not simply a necklace or earrings, but a unique piece of art. These and many more fabulous pieces are

available now in the Sun City Gift Shop.

Now would be a good time to look and see if the weeds are growing in your yard.
